Examiner:

INFORMATION DISCLOSURE STATEMENT UNDER 37 C.F.R. §1.97

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

In accordance with the duty of disclosure, enclosed is a copy of IDS Citation Form PTO/SB/08 or PTO-1449, together with copies of the documents cited on that form, except for copies not required to be submitted (e.g., copies of U.S. patents and U.S. published patent applications need not be enclosed). This IDS and IDS Citation Form are being submitted before the mailing of a first Office Action. It is respectfully requested that the cited references be considered and that the enclosed copy of PTO/SB/08 be initialed by the Examiner to indicate such consideration and a copy thereof returned to applicant(s).

It is hereby stated that no item of information contained in the Information Disclosure Statement was cited in a patent office in a counterpart application, and, to the knowledge of the undersigned, after making reasonable inquiry, no item of information contained in the Information Disclosure Statement was known to any individual associated with the filing or prosecution of the subject application more than three months prior to the filing of the Information Disclosure Statement.

Korean Patent Publication No. 2001-48328 is directed to a method for operating personal ad-hoc network between bluetooth devices, which comprises the first step that the bluetooth devices inquiry an existence of another bluetooth devices within the region of electric wave and determine whether to respond to the inquiry or not; the second step that, in case of being no response to the inquiry of the first step, repeat an inquiry and page scan and remain as masters of network on requiring of connection setting, and save slave information of the personal ad-hoc network and transmit it to another slave; the third step that, in case of being a response to the inquiry of the second step from the masters of the network, set a connection, change a role as a slave and receive the network information from the master of the network.

Korean Patent Publication No. 2002-29028 is directed to a simplified connection setup method between Bluetooth devices using pre-identification code.

According to the present invention, the simplified connection setup method between Bluetooth devices extract pre-identification code that is simpler than the address information from Bluetooth address information supplied to each Bluetooth module by using a predetermined generation function, and use it. First, it receives a pre-identification code input from users relating to devices for connection, and it performs inquiries about the peripheral Bluetooth devices, and it performs inquiries until it finds a Bluetooth device that matches the input pre-identification code. It performs the name discovery stage only to the devices that match the pre-identification code, receives the final confirmation from the user, and sets up the connection to the relevant Bluetooth device. By using the present invention, it performs inquiries only until it finds a device that matches the pre-identification code thereby reducing the connection-setup time between Bluetooth devices.

The references were cited in a Search Report dated February 24, 2005 (copy enclosed herewith) in a counterpart Korean application, which was forwarded to Applicant's Representative in a communication dated February 25, 2005.

The submission of this Information Disclosure Statement is not to be construed as a representation that a search has been made in the subject application and is not to be construed as an admission that the information cited in this statement is material to patentability.

Please charge any fees due to Deposit Account 02-2666. A duplicate copy of the Fee Transmittal (PTO/SB/17) is enclosed for this purpose.
